FLEXIBLE

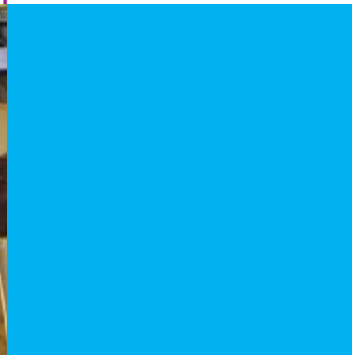

AND SOLID RESEARCH IN

INTERNATIONAL HEALTH

PASS

PARTNERS FOR APPLIED SOCIAL SCIENCES

PRACTICAL SOLUTIONS

SOLID & FLEXIBLE RESEARCH

AREAS OF EXPERTISE

Our team consists of international experts in epidemiology, anthropology and non-profit management.

WHAT WE DO

PASS International provides social science research and support to strengthen public health projects and clinical trials.

- Offering field research, we complement your medical and epidemiological investigation or project's implementation in the field.
- We evaluate the current state of interventions and determine potential obstacles to successful implementation. Our targeted research and on site participant observation provide concrete recommendations for administration adjustments and increased effectiveness.

HOW WE WORK

PASS international provides services tailored to your needs.

As *partners* for applied social sciences, we act in interdisciplinary research teams or act independently in close cooperation with client projects. We are specialised in providing **field research**, **consultancies** and **training courses** with flexibility of timing and location. If you are interested in more information, please contact us at contact@pass-international.org.
